This is an exceedingly large reference set from de Gruyter that constitutes the ultimate resource on this subject. Articles are written by the world's foremost scholars in each area. *ANRW* is considered to be one of the most reliable authorities on subjects touching the Roman world—which the NT does at many points. Please note that this bibliography covers only the volumes of *ANRW* listed above. These are the volumes that have perhaps the largest proportion of material directly related to NT studies. We hope to expand this bibliography in future years. There is a keyword searchable index to *ANRW* available at the U/Kentucky's classics department:
