Notes:

- All diacritics will “stack,” so to get ῖ
you type: h |] =
- Final sigma: type s followed by any
punctuation or a space
- Diagamma (if present in a font): Alt-v (F
= upper case form)
- In Word, other Greek characters need to
be entered using InsertSymbol or the
hex value + Alt-X [Ϟ, 1D510; ϟ, 1D513].
- Use BabelMap for other characters:
